While the City has a large risk retention program and is self-insured for workers’ compensation, Risk Management protects the City’s assets by ensuring that the most appropriate insurance coverage and risk financing methods are in place and are adequate for the City’s contractual, operational and organizational exposures. Insurance is usually procured to satisfy bond financing, administrative code or property leasing requirements. Risk Management is continually evaluating the City’s liability exposures. Insurance is also purchased if it is determined to be either cost beneficial to the City or required by contract or law.
